WiseMini® Humidity Control Sachet utilizes silica gel as the main component and controls the humidity rate inside a package at a certain range. It desiccates when the humidity rate in the package is higher than it needs to be and humidifies when it is lower than it needs to be. This product applies to medicines that need strict humidity rate control by stabilizing the humidity rate inside the package.

## WISEMINI® HUMIDITY CONTROL SACHET STANDARD

ITEM	STANDARD
Moisture Absorption Capacity (77 °F /25°C )	±5.0% nominal humidity control capacity
